<p><b>No test is to be run without a cholesterol screening. These are in addition to the Cardiac Risk Profile.</b></p>			

### ADDITIONAL TESTS

If you are interested in having any additional Health Screening tests from the same blood drawn for cholesterol/health panel, inquire about tests available.

You then must have your MD, NP, or PA write out a prescription/order for the test (s). Have a written prescription with you the day of the clinic.

You will also need to bring your insurance card to the clinic and fill out an additional form for INTERPATH Laboratory for the labs billing purposes. They will bill your insurance and bill you the balance after your insurance has completed the claim.

The results for additional tests will not arrive with your cholesterol /health panel. They will be sent directly to your prescribing MD, NP, or PA.

CDHD will have no record of results or billing.
